Board of Trade Luncheon

The monthly meeting of the Board of Trade will be held at the Oliver Hotel on Monday evening June 10th. The speaker for the occasion will be Superintendent W. Manson of the C.P.R.

Crossfield and Delburne Win Ball Games at Olds

The Crossfield baseball team split first and second money at Olds Sports on May 24th.

In the final game between Delburne and Crossfield rain interfered with the play and the game was called at the second innings. Both teams divided the purse getting \$75 each.

The first draw between Ponoka and Delburne was won by the latter, and Crossfield beat Olds by 1 to nil.

While Crossfield had only two locals on the team, nevertheless they supplied the money. Everett Bills hit safely, and reached first, stole second and then came home on Glen "Heavy" Williams' two base hit, scoring the only run of the game.

Bill Walker was on the mound for Crossfield, while Smoky Harris served Olds in a similar capacity. It was a real contest, and it was unfortunate that rain interfered during the game.

The umpire was an Olds man, and his partiality was all on the local side, and while the Crossfield boys are not squawking, they will think twice before going to Olds again to play ball.

\$25 a Month Bait Likely To Defeat A. S. Gough

A. S. Gough, Reeve of the Rosebud Municipality was a visitor in town Saturday. He has received the nomination for the Didsbury Constituency under the Conservative banner, and while A. S. would make an excellent representative, we are afraid that some one not so well qualified will be elected. Well versed in Municipal and School affairs, Mr. Gough would make a good member of the legislature.

It is hard to beat \$25 a month. Men go mad in heads but recovery takes place one at a time.

Bush Baseball League

Bottrel has withdrawn from the Bush League. The schedule has been readrafted with four teams, Cremona, Dog Pound, Water Valley and Atkins. Following are the games for the coming week.

May 29—Atkins at Water Valley; Dog Pound at Cremona.

June 2—Dog Pound at Atkins; Cremona at Water Valley.

New schedules are being printed and will be ready in a few days.

Midget Baseball League

Playing a fair sample of ball, the Knot Holes carried off the tournament on Friday last, defeating the Hot Dogs and the Koy Kups, and coping the ice cream.

Schedule does not count in the league.

Box score

R. H. E.
Knot Holes 013 121 0-8 1 1
Koy Kups 001 110 0-7 1 4
Batteries: J. Fleming and L. Sharpe; E. Hopper and W. Hall.

Knot Holes 002 101 4-11 2 7
Hot Dogs 000 101 5-7 0 7
Batteries: J. Fleming, E. Hopper and L. Sharpe; J. Williams, K. Miller, G. Goldie.

LEAGUE GAMES

This week's double header was played on Tuesday on account of some of the players taking in the soccer match at Calgary on Wednesday.

The Knot Holes were unable to repeat Friday's success and took the short end of the double header. Costly fielding errors lost the games for the Knot Holes.

Knot Holes 202 01-5 1 8
Hot Dogs 004 31-17 3 2
Batteries: J. Fleming and L. Sharpe; J. Williams and G. Goldie.

Knot Holes 030 32-8 2 6
Koy Kups 420 31-13 4 3
Batteries: L. Sharpe and J. Fleming; E. Hopper and W. Hall.

League Standing

Koy Kups P. W. L.
Hot Dogs 3 3 0
Knot Holes 2 1 1

Rev. D. C. Ramsey of Edmonton was a visitor in town on Friday.

Mr. Ramsey was the first Presbyterian Minister in Crossfield away back in 1903 and 1904.

Rev. H. Young of Trechu was renewing acquaintances in town on May 24th.

Social Credit Waning

Co-Operation Suggested

R. M. McCool, M.L.A. returned Sunday evening from a trip around the Cochrane and Bottrel districts.

When asked regarding the political situation, Mr. McCool said he received many encouraging reports. He found that many persons, including business men of Cochrane, who had previously supported Abert's scheme of Social Credit, were now definitely opposed to it. The general reason being that this so called "unearned increment levy" was nothing else but another tax. The average municipal or land tax being 5 to 7 mills, the farmer says, how can we pay an additional 20 mills as Mr. Abert suggests? Also they say how can any farmer pay 5 per cent. "levy" every year on the original value of all his machinery?

Mr. McCool said the general feeling seemed to be that there was only one party in the Province that had a chance to elect enough members to form a Government and that all parties should forget partyism and co-operate to bring this about, rather than have several small groups elected with no one having a majority.

Many prominent Conservatives and Liberals including an officer of one of these associations are suggesting such co-operation and have discussed it with an officer of our association said Mr. McCool.

He also drew attention to the fact that the Calgary Herald in an editorial of Saturday's edition had suggested similar action.

Girl Killed In Car Crash

Edna Wolstonscraft, 19 of Lethbridge was killed and Alex Belger and Fred Wilkinson seriously injured when the car in which they were riding smashed into the side posts of a highway bridge early Sunday.

The accident occurred near Ardrie when the lights on the car, driven by Wilkinson, went out. The car skidded, struck a post and halted in a ditch.

Local Rancher Sells Bulls For Shipment to U.S.A.

Frank Collicutt of the Willow Springs Ranch, recently sold ten head of Hereford bulls to P. Burns, to be used at the Bar U Ranch at High River. Mr. Collicutt also sold nine head to Frank Hill of Los Angeles, Cal., and two to Mr. Lampart of Redmond, Wash.

This make seventy-four bulls in all. Mr. Collicutt has sold this spring, and the entire number he had ready for sale.

Where or Where?

We notice on taking our annual tour of the village that the benches and tables belonging to the Park, have been removed and it would be nice for all concerned to see them restored at an early date, more so now that tennis and junior baseball activities are attracting the attention of the local populace.

While we are on this subject, how about the snow fence on Osler Street, surely it is time this fence was taken down and stored for the summer.

Many people from the town and district took in the big soccer game at Calgary Wednesday evening, amongst whom we noted the following: R. D. Sutherland, T. Sefton, T. Tredaway, C. H. McMillan, Mark Cameron, Mr. and Mrs. A. Stevens, Jimmie Dickson.

The touring Scottish team furnished a classical exhibition of their art.

Track and Field Sports Friday, June 7th.

A Track Meet will be held at East Community Hall grounds on Friday, June 7th. Elba, Floral, Rodney, Oneil and Tany-Bryn schools will compete. All pupils are welcome to take part, and it is hoped that a large number of parents will be present.

Mr. Motorist! You can get a complete grease job at the Highway Service Station during the month of June for 75c.

The weather has been cold and windy of late, with a light shower this morning (Thursday) and prospects of further showers during the day.

BUY YOUR OWN SIZE

They won't Shrink

Now you can buy your own size and be comfortable from the first time you put on a pair of Walker Trainmen Overalls, a Work Coat or pair of Work Pants bearing the "ZERO" label—right on through a dozen washings.

MAGOG ZERO SHRUNK

This label guarantees that the shrinking has already been done—that, no matter how often the garment is washed, it will not shrink out of fit—that it wears longer, fits better and looks better. Extra room to allow free and easy movement—properly pocketed for easy access and carrying of tools. Patented No-Way Suspenders—greater freedom of movement and there is no rubber to rot.

Leaders And Critics

In the face of enormous difficulties, which are the direct outcome of the Great War and the aftermath of depression following that terrible struggle, as more or less similar conditions have followed every great war in history, recognized leaders of men in all nations are striving mightily to bring order out of disorder and start the world on the road of progress and prosperity. Men are breaking down because of the burdens of responsibility they are carrying, and they are wearing themselves out mentally and physically in the effort to serve their fellow countrymen and the world.

In his almost superhuman struggle to maintain peace in Europe, and in his untiring efforts to promote disarmament, Ramsay MacDonald has become a much older man than his years. Reports that he must relinquish the premiership are now rife.

In Canada, Hon. R. B. Bennett has for five years devoted his every waking moment to the duties and responsibilities of government. People may criticize his policies and his methods, they may say he should have divided responsibility to a far greater extent with his cabinet colleagues instead of shouldering so much of the burden himself. But no one can say that as Prime Minister he has not given himself wholeheartedly and energetically to the discharge of the public duties and responsibilities placed in his care. As a result he has had a serious breakdown in health, may have to retire, and he has unquestionably considerably shortened his life.

Ex-President Hoover and President Roosevelt aged far beyond their years in office; the same can be said of the leaders of other nations, and it is true of men not only in the Federal arena in Canada but in the provinces and in municipal affairs. The strain is terrific, and men everywhere are paying the price. Yet they carry on because it is their duty to do so, and because they are sincerely desirous of rendering service to their country and fellowmen.

Probably because the great mass of people have difficulties and worries of their own to contend against and face, few of them give thought and little consideration to the manifold and gigantic problems which leaders in government everywhere are endeavoring to solve. Rather, men in public life are the targets for all kinds of misdeeds of abuse and criticism, and their task is made much more difficult by the carping complaints of men of less calibre and by demagogues and agitators who take advantage of the prevailing situation to stir up the unthinking masses for their own selfish and ulterior motives and designs.

Recently in a little known publication there appeared one of the type of articles which make a sane man disgusted. The writer thereof urged people to read history. He declared that in every great crisis heretofore, and everywhere, a man had arisen to lead the way out, and he cited that "Moses, Christ, Pym, Abraham Lincoln, were real leaders because they did new things, utterly regardless of what had been done before." He then added that at Ottawa two Neros, meaning Mr. Bennett and Mr. King, are fiddling while the economic capital burns. Surely, he says, after five years of labor Canada should be bringing forth a Nero.

This writer cites Moses. He was a great leader, but his people turned against him, commenced the worship of false idols, a calf of gold, and paid the penalty of forty years wandering in the wilderness.

The writer speaks of the Christ. He was the world's greatest leader of all time. Yet the people of his day rejected him and demanded his death.

Abraham Lincoln was a leader, but throughout his life was criticized and vilified, accused of being a partizan, and died at the hands of an assassin.

History applauds these leaders, and their names will live forever, but in their day and generation they were despised and rejected by many, the objects of criticism and derision, and their work for humanity made difficult by the spite and hatred of other so-called leaders who played upon the ignorance, the emotions and the selfishness of the masses.

The historian of the future will probably accord to the world leaders of to-day a much more honorable place and give credit where it is due, than the pettifogging critics of to-day are willing or capable of according to them. The names and deeds of these leaders will be recalled long after those of their present day critics have passed into oblivion and from the memories of man.

These leaders have made mistakes. Of course they have, because they are human with all the limitations and frailties of human beings. But many of their mistakes were not of their own volition, but were forced upon them by the acts of others, either not so sincere and high minded or who with less vision and ability adopted policies and followed courses of action which compelled others to steps which the latter knew to be mistaken but nevertheless had to be taken to avoid some possibly greater mistake and disaster.

The present is a time for patience and tolerance. It is no time for any well meaning person to be rocking the ship. That should be left to the wholly misguided and the irresponsible agitators. Constructive criticism is in order, and it is always welcomed by those entrusted with grave responsibilities. However, it is not the duty of the critic to destroy what he believes should be destroyed, but to help others to reconstruct and build up stronger and better.

For the 18 weeks of 1935 ended May 2, the total number of hogs graded in Canada was—graded alive at stock yards, 388,664; alive at packing plants, 769,726, and by carcass 21,652, a total of 1,159,042. For the corresponding weeks of 1934, the number was 1,180,223.

In the Aurignacian period of the Old Stone Age, 60,000 years ago, men in Europe were very tall, averaging just over six feet in height.

A Silver Jubilee Gift

Merchants Serving Royal Family Build House For King

King George, who already owns a palace, a castle and two huge estates, has received a house as a silver jubilee present. It is a gift of the Royal Warrant Holders' Association, whose members have served the royal household with groceries, furniture and everything else, and who are entitled to display the royal coat of arms over their stores.

The architect is C. Beresford Marshall, a young and comparatively unknown designer of thirty-six years, who up to now has been designing luxury apartments on the American plan for London.

Marshall's design is something like the American Colonial style without the pillars. It is being built at Burhill, Surrey, about thirty miles from London, on the estate of Lord Iveagh.

There is one principal bedroom and two guest rooms, with two double rooms for maids and a chauffeur's room.

The design was chosen by the King in consultation with Sir Giles Gilbert Scott, president of the Royal Institute of British Architects.

It is not likely, however, that the King will live in the house. In such cases he usually makes a present of the life-tenancy of the house to some minor member of the royal family, or to a high court official who is retiring from his service.

HE FELT MISERABLE AFTER MEALS

Acute Indigestion Relieved By Kruschen

The treatment which put this man right must surely be worth trying in every case of indigestion. Read what he says:—

Two years ago I suffered very much from indigestion, loss of appetite, and a most severe pain in my back. Food soured in my stomach. I felt most miserable after meals, and had no desire or appetite for them. A friend advised me to try Kruschen Salts. I did so, and I am most happy to testify that after a short time I felt the greatest relief. I continued taking Kruschen till I felt myself quite better and a new man. I feel as light-hearted as I did twenty years ago."—W. B.

What Kruschen did for him it will do for everybody else who suffers from indigestion as he did. The fact is that "the little salt" after Kruschen first stimulates the flow of gastric juices to aid digestion, and then causes a complete, regular and unailing elimination of all waste matter every day.

Saskatchewan Drama League

W. T. Read, Elected President At Annual Meeting

W. T. Read, Regina theatre enthusiast, was unanimously elected president of the Saskatchewan Drama League for the coming season by members gathered here for the annual meeting.

Key Edwards, Saskatoon, first vice-president, and J. Sinclair, Regina, second vice-president.

Mrs. Doris W. Hopkins and William Reid, both of Regina, were appointed secretary and treasurer respectively.

Mr. E. R. Myers, Saskatoon, the retiring president, took his place on the advisory board of the league.

Preventing Spread Of Disease

Passengers On English Air Lines Must Have Health Certificate

Air passengers in the future will be treated like beef being examined and stamped at the port of departure, according to Mr. M. Cadman, of Hull, England. In a conference in that city he declared that to prevent diseases being spread round the world by airplanes, passengers eventually would not be permitted to travel unless each carried a clean bill of health in documentary form.

Fruit-a-tives Gave Veteran Quick Relief From Constipation

Isaac P. Booth, 70 Wayland Ave., Toronto, states in a sworn statement how Fruit-a-tives gave him quick relief from constipation and rheumatism brought on by military service. "I was greatly bothered with constipation brought on by military service. I tried Fruit-a-tives and they gave quick relief and now keep me regular. I also suffered from rheumatism. Since I have used Fruit-a-tives, it does not bother me any more unless I take foolish chances in wet or cold weather." Copy of Mr. Booth's complete sworn statement will be sent free on request. Write Fruit-a-tives, Ltd., Ottawa, Canada.

FRUIT-A-TIVES—25¢ and 50¢ EVERYWHERE

Scheme To Bring Rain

Frenchman Requires \$10,000,000 To Go Ahead With Idea

Men are still seeking artificial rains and Mr. Bernard J. Dubos, of the Meteorological Society of France, is the latest to have a scheme. He would build a steel and concrete funnel 2,000 feet high. Through this he would force water vapor into the upper air with the thought that it would return in copious rains over a large area.

The funnel would be constructed so that it would be tapered with the broad end at the top and the whole supported by struts and pillars. It would be about 450 feet in diameter at the top and resemble a large telescope standing on the smaller end.

The underlying idea is to have a series of wind vane at the top which will catch whatever breeze there may be and start a whirl of air inside the funnel to create a vacuum. This would create a vacuum, and the whole, for instance, to pay the interest and principal on that much money.

Perhaps Mr. Dubos will not get anyone to take him up on his venture. But that will not curb other scientists and inventors trying to find some way to get rain from the clouds. And, some day, one of them is quite likely to solve the secret, even though people may laugh at his efforts while he is experimenting.

Handicraft Exhibition

Public Rooms Of Cunard White Star Lineer Ascania To Be Used

The Hon. William Joseph Parnell, M.C., M.D., C.M., F.A.C.S., L.M.C.C., Prime Minister, Provincial Treasurer and Minister of Education of Prince Edward Island will open the Canadian Handicrafts Guild special exhibition being held on board the Cunard White Star liner Ascania, it was announced by Colonel Wilfred A. Bovey, president of the Guild.

Dr. McKeown is also president of the Prince Edward Island branch of the Guild, and is visiting Montreal at this time to receive an honour from McGill University.

The show will be held in the public rooms of the steamer with the Ascania, in port along the St. Lawrence No. 2 on her next trip to Montreal.

A wide range of hand-made crafts will be exhibited, ranging from the most delicate textiles to wrought iron pieces. From Montreal will be a group of copies of old Canadian furniture and lamps which have been effectively used locally. There will be two examples of old Canadian country chairs, one with leather thong seat and the other with twisted bark seat.

The Four-Dollar Bill

Reason They Are Rarely Seen Is Not Generally Known

An article in the Port Arthur News-Chronicle says: "In a Cumberland shop window a Canadian four-dollar bill has been on exhibition as a rarity. Most people know that the four-dollar bill is a rarity because so seldom seen in circulation but the reason is not so well known.

When the first issue was made something over 30 years ago it was found carrying a picture of the Michigan So. locks. Someone at Ottawa had got hold of the wrong picture, evidently intending to put the picture of the Canadian So. locks, then comparative new, on the currency. As soon as the bill began circulation the error was noticed and called to Ottawa's attention, particularly by residents of the Canadian So. Naturally, the issue with that particular picture was not continued. Hence the rarity.

Comment Names In China In Canada the Smiths and the Joneses take good prizes for telephone sales. In China it's the Chens and the Wongs. In the Shanghai directory there are 636 Chens. The Wongs are pretty close with 574. Other popular Chinese names are Woo and Koo and Ding and Dong. Also to be found are the Ahs and Oos.

A woman writer advises women to "treat your maid with the same respect as you treat your husband." Especially if you like hunting fox new maids.

Collection Is Valuable

Japan Afraid Ancient Clocks May Soon Be Sold

Fears that the famous "Daimyo no Toki" collection of timepieces, once owned by leading Daimyo together with old books on the subject of clocks, will soon be lost to Japan, is being expressed by Japanese newspapers. The clocks have been known as the Takabayashi collection, and have been kept at the Tokyo Museum of Science for many years.

They were recently offered for sale, and an American collector offered \$15,000 for them, a bid which was increased by a British resident in Kobe. It is not believed that the collection has actually been sold, but it is feared that if the intention to sell becomes widely known collectors in Europe and America will offer such a price that the owner will part with them.

Serfdom Abolished

By New Decree Ethiopia Advanced In Civilization By 1,000 Years

Emperor Haile Selassie issued a decree abolishing serfdom throughout Ethiopia and equalizing the system of land taxation.

An announcement said the masses acclaimed the step and added that the abolition of unequal land taxation would advance Ethiopia 1,000 years in civilization.

Ethiopia for centuries was one of the most profitable centres of the African slave trade and while other countries gradually abolished the traffic, the institution remained in that country even after its admission to the League of Nations. In recent years slavery there has taken the form of forced labor and "debt peonage."

Scouts From Many Lands

Five Thousand Expected To Visit Poland This Summer

Five thousand Boy Scouts from many parts of the world will gather at Apala, Poland, this summer to celebrate the twenty-fifth anniversary of the Boy Scout movement in Poland. The United States, Great Britain, France, Belgium, Holland and Scandinavian and Slavonic countries will be represented. General Baden-Powell, the founder of all Scout movements, will be represented by his deputy.

Western Student Wins Honors Pass lists for the first, second and third years of the faculty of dentistry, McGill University, were announced at the office of the dean. Nathan Frank Gropper, Saskatoon, won the prize for the highest standing in the third year as well as the lieutenant-governor's medal for the highest percentage in dental pathology and dental therapeutics.

The lowly jackpine is a valuable tree in Michigan, since it grows where other conifers fail and is useful in reforesting burned-over areas.

Cheerfulness is contagious. Expose people to it and they will contract it.

Inventor Tells London Audience Vertical Flying Is No Longer A Fictitious Dream, But A Reality

Vertical flying is no longer a dream, but a reality. Such, at least, was the contention of Senor Juan de la Cierba, the inventor of the autogyro, when he spoke to the Royal Aeronautical Society recently in London. One of his autogyros has succeeded in taking off the ground without a run, he said.

"As a matter of fact," he added, "I succeeded in leaving the ground without a run as far back as 1933, but the usual secondary troubles did not allow the system to be sufficiently developed to give absolutely conclusive results until now."

"I have the honor," he then declared, "to make public here for the first time that this result is now achieved. The experimental machine was not intended to give a really good performance in leaving the ground, but was more in the nature of a test bench to investigate the principle itself and to perfect the mechanisms used. In spite of this it is perfectly capable of leaving the ground in no wind, with blocks in front of the wheels."

"I want to explain," he added, "that the results obtained, while absolutely conclusive, are still experimental, and prudence forces me to refrain from making any forecast as to how soon they will be obtainable in a practical way."

Further experiments were being conducted, and when fully developed, the autogyro, he felt sure, would be able to jump small houses and trees from a distance of only a few yards. A new experimental machine is to be built, incorporating what has already been discovered.

Senor de la Cierba explained the method he used. The autogyro, he said, still retained its same characteristics, and was not converted into a helicopter. That is to say, the rotor, or windmill, is not engine-driven while the machine is in flight. The rotor has a system of variable pitch blades, and with the blades set at zero pitch on the ground the engine spins the rotor up to high speed. The engine is then decelerated and the pitch of the blades increased to normal and the machine spins itself into the air. Ordinary forward flying is then started by the ordinary engine and air-screw.

Senor de la Cierba explained that the manoeuvre of taking off vertically was a very simple one from the pilot's point of view, easier and more pleasant than the ordinary take-off. "Excellent improvements," he concluded, "will make foot landing a perfectly safe manoeuvre, and I can say we are ready to study any form of application involving flying from small platforms or reduced enclosed spaces."

Battle Against Flu Gern

New Field Of Action Is Found In Alaska

Medical science's battle against the "flu" germ, cause of oft-recurring epidemics the world over, has found a new field of action at Point Barrow, Alaska—where a sudden scourge has claimed several lives.

Sensing the "importance" of any new epidemic, two Philadelphia physicians, Dr. Horace Pettit and Dr. Sergeant Pepper, left Newark, N.J., by plane in a dash to the ice-bound Arctic coast.

The epidemic offers an unusual opportunity to gain valuable new information for that long-sought "cure". Medical men say disease epidemics among natives, unused to civilization's ways, are always apt to be particularly virulent. All but one of the Point Barrow dead were natives.

Questions For Drivers

Do you give all your attention to your car when you are driving?

Do you always drive at a reasonable speed, giving due consideration to traffic, road and weather conditions?

Do you always give the right of way to pedestrians, especially children and older people?

Do you always keep to your own side of the road?

Do you become excited when confronted with a sudden emergency?

Do you always keep your car in perfect mechanical condition?

Do you "cut in" when passing another car on the highway?

Do you strictly observe all traffic rules, stop lights and signals?

A dry onion powder, for use in cat-soup, canned soup, and similar products, is now on the market.

Meat Prices Are Firm

Demand For Lamb Is Likely To Be Increased

As a result of drought conditions in the United States there is now a real shortage of beef and pork. The rapid diminution of supplies of cattle and hogs at all leading United States stock yards indicates that our good neighbors in the south will be forced to readjust their meat eating to include a larger proportion of lamb.

In Canada the situation is likely to follow along somewhat similar lines. Already as a result of the rapid rise in the price of beef across Canada and the firm condition of the hog market due to heavy exports of bacon to Great Britain and lower hog deliveries as compared with a year ago, the position in regard to the consumption of lamb is becoming increasingly favorable.

Lamb in both Canada and the United States is, at the moment, a bargain counter meat. In the United States sheep flocks have withstood drought conditions much better than other livestock while in Canada, as a result of a definite and constructive sheep policy, lamb in Canada has been greatly improved and is available in the year round as early spring lamb, as grass-fed lamb or as finished feedlot lamb.

Training That Is Valuable

Young People Being Taught To Speak Before Public

In drama and oratory it appears to us that the youth of to-day are preparing to excel the older generation greatly. The teaching or oral composition in the high schools has been a worthwhile innovation the past few years. Dramatic societies in schools and in communities are also teaching the young folk expression and skill in handling themselves in public. The art of being able to express oneself well before a group of people is surely a valued accomplishment that many intelligent people to-day lack, and rarely feel the need of, through a lack of necessary training earlier in life.—St. Mary's Journal-Argus.

Three hundred and seven people pay 30 per cent of Canada's income tax. Their incomes ran over \$50,000 a year each.

An envelope is like a woman; it can go anywhere without address.

The SNAPSHOT GUILD

Make the Camera Your Traveling Companion

Let your camera be your favorite traveling companion. Your vacation and travel snapshots will serve admirably in illustrating letters you write later to relatives and friends.

A member of the Snapshot Guild returned recently from a rather long journey after visiting relatives in many cities. "I had a lovely time visiting and enjoyed the traveling," she wrote, "but one thing took a lot of joy out of my trip. I did not take along my camera. No, I didn't forget it. I simply didn't take it and I thought no more about it until I reached my sister's home. Then I discovered something. I have been reading the Snapshot Guild, have taken quite a number of good pictures by following instructions, but didn't realize that I had unconsciously developed an eye for pictures," she continued.

"When I arrived at my sister's home—my first stop—I saw unlimited possibilities for interesting, story-telling pictures. I hadn't seen my little niece Jean since she was a month old and here she was toddling around and getting into all kinds of mischief. I could easily have taken six or eight snapshots of this cute youngster doing all kinds of interesting things."

With the coming of warmer weather and more sunshine we are reaching that time next year when nature is discarding her drab, winter clothes for the bright colors of spring and summer. It is a glorious time of the year.

As the sun becomes brighter and

Egg Grading Regulations

Co-ordination Of Federal And Provincial Facilities In Respect To Manitoba

Co-ordination of Dominion and provincial facilities in the more effective application of egg-grading regulations in Manitoba has been agreed upon following recent conversations between Hon. Robert Weir, Dominion minister of agriculture, and Hon. D. G. McKenzie, provincial minister. It was stated, both ministers declared themselves emphatically in support of grading and the carrying of the higher graded return back to the producer.

A statement issued from the department of agriculture said: "The province, as indicated in its recent activities in this direction, is systematically following up the principle of licensing egg-handlers. It is intended that bonding requirements will shortly be included as well."

The Dominion Department, through its egg-inspection service, will concentrate on securing accurate and efficient grading, and the uniform application of grading through all channels of trade.

A Clever Mechanist

Blind Man Uses Electric Bench Saw Without Accident

Harold Webb, 33-year-old Barrie, Ont. resident, is totally blind, yet he operates his own machine shop, keeps 145 colonies of bees, repairs clocks and tunes pianos. He builds his own beehives and frames, and has learned to extract honey without help. His machine shop has a steam boiler and two electric bench saws. These latter are covered with specially designed hoods, and to date his blind operator has never cut himself.

How Happiness Comes
Those who have the sense of happiness think the least about it. But in thinking about and in doing their duty, happiness comes—because the heart and mind are occupied with earnest thought that touches at a thousand points the beautiful and sublime realities of the universe.—W. M. Thackeray.

Doctor: "Your master is decidedly better, Thompson, but very irritable. He must not be thwarted."

Butler: "He expressed a desire to wring my neck, sir."

Doctor: "Well—er—humor him."

Immigration And Customs Restrictions Slacked In Serious Bid For U. S. Tourist Trade

Zones For Seed Production

Act Passed By B.C. Legislature Will Protect Growers

Zoning for seed production was the purpose of one of the acts passed by the British Columbia Legislature this year. Under this act any community interested in seed production may be protected from cross pollination and such like dangers. This bill, known as the Seed Growers' Protection Act, was devised to facilitate the growing of pure seed of vegetable and field crops. Upon application for such a seed zone, the Governor in Council may appoint a committee who will have complete control over the crops grown in that area. The penalty for non-observance of the committee's rulings is a fine of \$100. Only one variety is allowed to be grown in one community, so that for instance, a man who is growing one variety of onions for seed will not have his crop ruined by cross pollination from other varieties. All will grow the same variety.

The petition to form such a zone must be signed by at least sixty per cent of the land owners in the proposed seed area, which eliminates the lease holders from controlling the situation. The personnel of the committee may be recommended by the applicants, and the minister also names one member. This committee has the power to carry out and enforce the provisions of the act, to employ, direct and supervise such employees as are necessary, to pay the wages of such employees. Funds for this work are provided by the owners of the land in such zone, who are assessed according to requirements.

Invents Automatic Train

Russian Thinks It Will Make 450 Miles In Four Hours

Having a speed of over 100 miles an hour, an automatic train has been invented by G. Polinian, who is exhibiting a model in the Institute of Transport Inventors in Moscow, Russia. He expects to see his invention make the Moscow-Leningrad run of 450 miles in four hours. The train will have a Diesel motor of 500 horsepower and special stabilizers to eliminate all possibility of derailment. It will have three coaches for 225 passengers.

A Treasured Souvenir

Naval Officer Has Golden Jubilee Gift From Queen Victoria

While the empire celebrates the King's silver jubilee, Harry Davis, of Victoria, B.C., regards with pride a tiny brown beer jug, made at the command of Queen Victoria for her golden jubilee in 1887.

The souvenir was one of a limited number presented by the queen to officers of the royal navy. The model has long since been destroyed. Raised figures in white on the side of the jug depict Queen Victoria on her throne and the many sections of the British Empire.

From Waste Material

Brooklyn Children Make Many Articles For Exhibition

A store in Brooklyn, N.Y., recently opened an exhibition of objects made from waste materials by children in settlement houses under the supervision of teachers of homecrafts of the recreation department of the work division, emergency relief bureau. The exhibition, which continued all week, included such articles as dresses, skirts, letter openers, fruit dishes, bells and wall plaques.

An All-Silver Piano

Declared to be the largest piano in the world, an all-silver instrument was first played in a London broadcast recently. It is 11 feet 8 inches long, and 12 men are required to move it. The piano was built especially for the King's Jubilee celebrations. It cost \$3,000 and required a year to construct.

"What makes you think Bange is a college man?"
"I asked him a simple question at the office today, and he said 'duuno!'"

In 1800, a Frenchman conceived the idea of making an endless web of paper by introducing a water suspension of pulp on to an endless moving belt of wire.

Canada Is Making A Serious Bid For The United States Tourist And, In Co-operation With The Dominion Bureau

whose business it is to boost this country's attractions, immigration and customs restrictions have been considerably slackened. Canada wants the tourist, and is prepared to go a long way to induce him to some here.

Thorough customs routine which not infrequently deterred the foreign sportsman from visiting the country has been eliminated. Motorists coming here equipped with fishing rods, guns, golf clubs, camping material and such like no longer are obliged to declare these on varied and various governmental forms. Now an omnibus permit replaces the proforma and provides for declaration of all items in the visitors' outfit.

One more annoyance in the abolition of the guarantee bond required from a tourist desirous of spending more than 90 days in Canada has been removed. Neither bond nor deposit will now be sought, up to a period of six months.

Thus, if a visitor finds the country sufficiently attractive to stop over his initial permit period, he may do so without being required to find someone to stand surety for his good faith.

Permits are no longer required for those who wish to visit Canada for two days. This is a 24-hour extension on the former practice.

Without at all impairing the treasury of the country, Canada has removed embarrassing restrictions relating to baggage and personal effects of tourists. For example, typewriters and similar machines may be admitted free when used for temporary purposes. Smokers will be allowed to bring in with them a maximum of 50 cigars and 500 cigarettes.

Supplementing these arrangements are the instructions that have gone out to customs and immigration officials which, to all intents and purposes, make the officers allies of the tourist bureau. Courtesy is the watchword—courtesy and service.

Apples Go Far Afield

South American The Third Largest Importer Of B.C. Fruit

South America is the third best importer of B.C. apples following Great Britain and Egypt with 40,286 boxes. But unlike Egypt, Brazil and the Argentine were the biggest red apple so they insist on the large Delicious. Just as it is difficult to sell a large apple in Great Britain so it is difficult to sell a small apple to the South Americans. They took 38,198 boxes of Delicious and the bulk of the balance was made up of Yellow Newtowns with 1,815 boxes, along with 237 boxes of Spitzenbergs and 15 boxes of Winesaps.

France is the fourth importer of B.C. apples, taking 24,780 boxes, mainly Delicious, 16,613, Yellow Newtowns 5,292 and McIntosh 2,728.

South Africa took 19,265 boxes of B.C.'s 1934 crop, running mainly to Jonathans 12,469 and McIntosh 5,241.

Scandinavia bought 16,181 boxes, of which 14,169 were Jonathans—Country Life in B.C.

Leads In Hog Production

Alberta Takes First Place Among Canadian Provinces

Holding hog production volume steady for the past three years and greatly improving the quality, Alberta has taken first place among the Canadian provinces for the first time.

Ontario formerly held first place, but her production slumped this year, with 250,000 head below Alberta for the first four months of 1935.

Official federal grading reports show for the first 18 weeks of 1935 that there was graded in Alberta during 1935—338,427 hogs. The same period last year showed 342,995 and in 1933 333,271 hogs.

Reports New Disease

A new disease called a twin of diabetes, which shows itself in excessive hunger was reported to the American College of Physicians at Philadelphia. Diabetes is due to the body's inability to handle sugar. The twin is just the opposite; the body demands excessive sugar. Seale Harms, M.D., professor emeritus of medicine at the University of Alabama, made the report.

More than 1,500 people have written biographies of Lincoln.

WORLD HAPPENINGS
BRIEFLY TOLD

Gene Tunney, former heavyweight champion of the world, is giving up his vocation of globe trotter for one as prospector.

The late Col. T. E. Lawrence, who achieved a hero's role in Arabia during the Great War, lived in recent years on an income of £100 (about \$466), a close friend disclosed.

Canada spent on military purposes alone \$146,478,320 from 1921 to the end of February this year, according to a return tabled in the House of Commons.

Emperor Haile Selassie of Ethiopia has sent a personal telegram to the League of Nations asking it to stop Italy's military preparations in northeast Africa.

A return tabled in the House of Commons disclosed that since July 1930, a total of 97 judges in various branches of the judiciary have been appointed to positions for which the salary is \$5,000 a year or more.

The radio branch, department of marine, announced the following have been awarded commercial certificates of proficiency in radio: C. S. Baker, Meets, Sask., and B. L. Marshall, Saskatchewan, Sask.

For fear that Mohammedan listeners might be offended, the British Broadcasting Corporation has banned the use of the word "Allah"—the Arabic name for God—on its programs.

A party of 15 Canadians will sail from Montreal shortly on tour of Russia, principally to study Soviet administration of justice, it was announced. The party will be headed by Prof. Frank Scott of McGill University, Montreal.

Dr. J. S. Lapp, chairman of the public dental health committee of the Ontario Dental Association, announced more than 96 per cent. of Ontario dentists had expressed themselves in favor of state medicine or health insurance for all persons below a certain income.

Gift For Chief Guide

Lady Baden-Powell Receives Standard and As Token of Loyalty

Lady Baden-Powell, Chief of the Girl Guides of the World, is privileged to use her own special standard.

In 1922 some of the English County Commissioners planned to make a standard for the Chief Guide, and a small committee was formed. Overseas Commissioners of Provinces and States joined the County Commissioners. Each emblem was worked, and all were gathered together and mounted. The Standard is a token of loyalty and regard to the Chief Guide.

The Emblems are as follows: The Trefail in gold on blue—the Guide Emblem showing the three waves and dolphins, with three ships sailing forth to the end of the earth to carry the Guide Movement to all parts of the world. Also in the midst of the sea is the Gold Fish which the Chief Guide alone wears.

Then there are red motto bands—the red for cheerfulness, and the mottoes are, on the other side, "Be Prepared," and on the other, "Ar nyd yd yd yd yd," the Powell motto in Welsh, meaning "Where there is a Powell there is safety."

Between the motto bands is a space of green and white triangles, and they are the tents of the Guide camps on the green grass, referring to the outdoor side of Guide life.

In the fly are two fine lions, and these are the Baden and Powell crests. It is not possible for a woman to have a crest, as they are worn on a man's helm in battle, but here they are, to turn Guides' thoughts to their great founder, who in his leadership and comradeship for the Scout and Guide Movement has been so splendidly helped by the Chief Guide.

Canadian High Commissioner

Hon. G. Howard Ferguson, Canadian high commissioner in London, had been seriously ill but had recovered, and there was no thought of replacing him. Prime Minister R. B. Bennett declared, Mr. Bennett declared that the present Canadian high commissioner was one of the greatest ministers to hold that office since Sir Charles Tupper.

Wouldn't Wish For Two

Willie—I wish I had a million dollars. I'd go to picture shows every day. Jimmie—You'd take me with you, wouldn't you, Willie?

Willie—Now. If you're too lazy to wish for yourself, you can stay at home.

An Interesting Test

Shows More Boys Are Color Blind Than Girls

One boy in ten is color blind. This is the discovery of Dr. James Drever, professor of psychology in University of Edinburgh, made in tests of pupils in public schools.

"This can have tragic consequences," says the professor, "especially as now winking red, green and amber lights control the traffic and aircraft are the future drivers of motor vehicles."

The figures represent a 100 per cent. increase over previous calculations.

"It is a serious thing to discover that 12 boys out of 120 might confuse the 'stop' and 'go' signals of traffic lights," he said.

"Nothing can be done to cure color blindness. If it is possible to correct confusion between certain colors with spectacles, the result is that other colors become confused."

"A similar number of girls was tested, but in only one instance was there defective color sense."

It has been found that while fewer girls are color-blind, color-blindness is transmitted to children from mothers rather than fathers. The mother of colorblind children often isn't so afflicted herself.

FASHION FANCIES

CAPED DRESS FOR LARGER FIGURES—PERFECT FOR WARM DAYS

By Ellen Worth
The cape is versatile. It's almost magic. It seems to turn into sleeves at the front, while you look at it. The wide overhang, arranged, always a favorite with the larger woman, slims the figure so perfectly. Skirt pleats allow plenty of freedom for walking.

Maize eyelid ballet, so refreshingly cool to look at and to wear made the original. You can copy it exactly at very little expense.

Chiffon cotton voile prints, linen prints, tub paste or white silk, chiffon aerserker in stripes or checks, etc., are other lovely mediums for your choice.

Style No. 381 is designed for sizes 36, 38, 40, 42, 44, 46 and 48 inches bust. Size 36 requires 3 1/2 yards of 39-inch material.

Patterns 20c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

The Spring Fashion Magazine is better than ever. Entirely illustrated in color you will find it a very stimulating fashion edition. There are clothes for cruising and clothes to brighten the lives of stay-at-homes. Many delightful models for the smaller members of the family. Of course, patterns are obtainable for your copy to-day, the price is 30 cents.

World Is Getting Better

The Anshersburg Echo says the jail at Moorestown, Ontario, is to be sold by auction because it has held no prisoners for forty years.

Turnkeys at Sandwich had to wash dishes because there were no prisoners to do it. There was no cook in the Winnipeg jail because of a lack of prisoners of that category. The world's improving.

The side of the moon seen from the earth is marked by about 80,000 craters ascribed to meteoric origin.

BRITISH CABINET SHAKEUP PREDICTED AS SIMON'S POLICY CRITICIZED

Reports from London state that changes will shortly be made in the British cabinet, and that there is a possibility of Premier Ramsay MacDonald (left) succeeding Sir John Simon (centre) as British Foreign Minister. Rumors are current that a section of the Conservative party is dissatisfied with the handling of foreign affairs by Sir John, and if MacDonald took his place, Stanley Baldwin (right), would automatically become Prime Minister.

Young Scientist Returns

Englishman Finishes Two Years Study In The North

Two lonely years in the Arctic are over for T. F. Manning, youthful British scientist who made studies in the distant north for the British Geographical Society.

Travelling alone, the young Englishman came trudging into Churchill from Southampton Island, 500 miles north of there.

Modest and more than a bit bashful, Manning was not talkative about his sojourn in the Arctic through two summers and winters. His studies were extensive, including even fauna of the region.

Most of his two years in the Arctic was spent alone on Southampton Island, a Hudson's Bay Company post point where he obtained supplies. His long trek out was made without a companion. With a team of four dogs, he hit southward.

On the journey he crossed 40 miles of dangerous ice floe between Southampton Island and Chesterfield Inlet. Then he followed the ice along the coast south, making the journey into Churchill without mishap.

Best Advertising Medium

Newspapers During 1934 Received Largest Share Of Allotments

Newspapers during 1934 received 61.8 per cent. of \$223,216,520 sent by 367 national advertisers during 1934, according to an analysis released by the bureau of advertising of the American Newspaper Publishers Association.

The report showed that magazines received 25 per cent. of the total amount, while chain broadcasting received 13.2 per cent. Compared with 1933, when the bureau analysis covered the appropriations of 351 advertisers spending \$185,706,424, the current analysis showed both a greater number of national advertisers as well as a higher individual expenditure.

Wine Annual Contest

William Berrigan won \$61,000 when the ice at Nenana, 50 miles west of Fairbanks on the Nenana river broke May 15 at 3:32 p.m. Berrigan guessed the time to the exact minute in an annual contest that draws participants from nearly all of Alaska.

Teacher: "Are there any more questions you would like to ask about whales?"

Small Girl: "Teacher, what has the prince got to do with them?"

"Me lord, your coconut is served."
—Smith's Weekly, Sydney, Australia.

Newest Naval Weapon

Germany Has Already Constructed 450 "Vest Pocket" Warships

Re-arming Germany's newest naval weapon—swift "vest pocket" torpedo boats as revolutionary as her "vest-pocket" battleships—was revealed recently.

Foreign naval experts said the Reich already has constructed 450 tiny speed boats, capable of 60 knots each, and manned by five men and carrying four torpedoes.

A second, similar development, the experts said, is another speed boat twice as large, carrying 10 men and having an operating range of almost 2,000 miles.

Naval observers, asserting the new craft would give other powers much food for thought as the Reich's recently disclosed plans to build 250 submarine, listed these major advantages of the craft:

Their cost is little and their operation economical; their crew is small; they are so small and can change direction so fast they would be hard to hit; their four torpedoes, with any kind of luck, can do damage to enemy ships.

Recipes For This Week

(By Betty Barclay)

CHOCOLATE NUT FUDGE

2 cups sugar
1 cup karo
2 1/2 squares unsweetened chocolate
1/4 teaspoon salt
1/2 cup milk
1 teaspoon vanilla.
1 cup chopped nut meats

Combine the ingredients (except the nuts and vanilla) in the order given and cook until the mixture forms a soft ball when tried in cold water, 238 degrees F.; cool until tepid, add vanilla and nuts and beat steadily until thick and creamy. Pour into a medium sized oiled pan, and when almost cold, cut into squares.

ICED PINEAPPLE COFFEE

1/2 cup sugar
1/2 cup water
1/2 teaspoon grated orange rind
8 cups cold coffee
1 cup Hawaiian pineapple juice
1/2 cup cream
Boil the sugar, water and orange rind together for 10 minutes. Cool, strain and add cold coffee. Just before serving add pineapple juice and cream. Serve in tall glasses filled with cracked ice.

SUNDAY SCHOOL LESSON

JUNE 2

OUR DAY OF WORSHIP

Golden text: God is a spirit; and they that worship him must worship in spirit and truth. John 4:24.

Devotional Reading: Psalm 92:1-5, 12, 13.

Explanations And Comments
Let Worship Be Joyful, Psalm 100. The Psalmist calls upon all lands to worship God. "Think of an Israelite so enlightened as to God's purpose," exclaimed Dr. F. B. Meyer, "as to call upon all lands to join in the great chorus of God's praise! This is surely the missionary hymn of the Church! The Psalm is known as the Old Hundredth, but the name is a misnomer. It is always new."

Worship God with a joyful heart, make a joyful noise, serve him with gladness, come before him with singing. This frame of mind should be natural to one for God is our Creator, we are his people, the sheep, as it were, of his pasture, for whom, like a shepherd, he tenderly cares. It is a poor congregation that can stand contented to be dumb when God is praised. If gladness is part of our service of him, all of us will refuse to be silent. The Old Testament church was not ignorant of the devotional use of a choir, but the property which most metals possess of being drawn out into wires and gold is so ductile that one ounce can be drawn into a wire about 50 miles long.

Pure gold is used as gold leaf. The metal is too soft to be used alone for other purposes and is alloyed with silver or copper. The fineness of gold is usually expressed in terms of carats, 24 carat gold being pure, while 18 carat (75 per cent.) is the grade used for the best jewelry.

Cows Attend Banquet

Two Bovines Are Guests At Luncheon In New York

Members of the American Guernsey Cattle Club sat down to their annual luncheon at New York with two of their most distinguished protégés, who mooed and bellowed throughout.

The guests of honor, Iceberg and Foremost Southern Maid, ate grass and took bowls from a centre table in the banquet hall of a midtown hotel.

It was Iceberg's first glimpse of civilization. He was born on the edge of the Antarctic circle with the Admiral Byrd expedition. Foremost Southern Maid is one of the three cows the expedition took along to furnish milk to the men.

At the luncheon the gold medal awarded to Admiral Byrd by the club for "distinguished service to the dairy industry" was received by Lieutenant-Commander C. O. Noville in the absence of his chief.

The two bovines, accustomed to the hazards of an adventurous life, took the whole proceedings much more calmly than the jittery bellhops pressed into service as cow hands for the occasion.

Cheap Sea Trip

Organization In Germany Provides Cruise At Low Cost

For a three-weeks' cruise to Madeira at a cost of only \$6.25 a week, 3,000 German workers will shortly leave Berlin. The charge includes everything—fare, food, trips and tips and is one of the cheapest cruises in the world. It is organized by the "Strength Through Joy" movement, and the workers and their families will travel on German liners. Many of them have never seen the sea. Last year the "Strength Through Joy" movement sent 80,000 workers on sea voyages, and this year it is hoped to send 160,000.

The earth's population is doubling about every 80 years. At this rate, there will be 3,800,000,000 persons on earth before the year 2000 A.D.

Believed to be 2,000 years old, a dugout canoe has been found at Goshi-mura, Japan.

Little Journeys In Science

GOLD

(By Gordon H. Guest, M.A.)

The use of gold dates from earliest times and it is probable that it was one of the first metals used by man. Native gold occurs in veins running through quartz rock and also in the beds of streams whose sands have been formed from the breaking down of such gold-bearing rocks. It has been discovered in nuggets which vary in size from a tiny pebble to a mass weighing over a hundred pounds. In the past few years the gold production of the world has amounted to about \$400,000,000 annually. Of this amount South Africa produces over half.

Native gold is obtained in crude form by placer mining. The sand containing the gold is shaken or stirred in troughs of running water, called sluices. The sand is swept along leaving the heavier gold at the bottom of the sluice. Sometimes the sand containing the gold is washed away from its natural location into the sluices by powerful streams of water.

In the amalgamation process the powder containing the gold is washed over copper plates whose surfaces have been amalgamated with mercury. The gold sticks to the mercury or alloys with it, and after a time the gold and mercury are scraped off and the mixture is distilled. The mercury distills off leaving the gold behind in the retort ready for refining. The cyanide process depends upon the fact that gold is soluble in a solution of sodium cyanide in the presence of oxygen in the air. The powder from the stamping mill is treated with a very dilute solution of cyanide which dissolves the gold. The gold is obtained from this solution by electrolysis.

Gold is a yellow metal which is 19.3 times as heavy as an equal volume of water. Gold is the most malleable and ductile of all metals. Malleability is the property of a metal to be hammered or rolled into sheets and ductility is the property of a metal to be drawn out into wires. It requires 280,000 leaves placed one upon another to occupy the thickness of an inch, and furthermore one ounce can be hammered out so as to cover 159 square feet. Ductility is the property which most metals possess of being drawn out into wires and gold is so ductile that one ounce can be drawn into a wire about 50 miles long.

Pure gold is used as gold leaf. The metal is too soft to be used alone for other purposes and is alloyed with silver or copper. The fineness of gold is usually expressed in terms of carats, 24 carat gold being pure, while 18 carat (75 per cent.) is the grade used for the best jewelry.

Some Strange Customs

Ethnologist Tells About Quaker Ideas Of African Tribes

Frederick G. Carmichael, ethnologist, has returned to New York from an Africa sojourn and explained, among other things, how the Womanyem tribes christen their babies by the names of their ancestors. It happens to a tribesman's wife when her spouse gets hurt in the hunt.

At a christening ceremony, he said, the high priest holds the baby and calls off the names of its ancestors. When the child sneezes as it invariably does, it is an indication that an ancestor's soul has entered its body and the baby takes the name of the ancestor thus saluted.

When a member of the tribe is hurt on a hunt, said Carmichael, the wife and mother are given a knock on the back of the head to make amends.

Extensive Salvage Plan

Attempt To Refloat Ships At Bottom Of White Sea

Twenty ships resting at the bottom of the White Sea since the years of the Great War will again see the light of day according to the schedule of a special squad of engineers working day and night on plans for the refloatation, cargo salvaging and junking. And though complete maps of the White Sea prepared at the port of Archangel exactly designate the resting places of no less than 114 ships which went down in the same period, only twenty are considered technically possible to salvage.

Canadian macaroni imported into the British Isles has become so popular that this Canadian export has reached to within measurable distance of the big supplies from Italy and France.

"Did you hear what they do with ferryboats when they're late?"

"No, what?"

"Dock 'em."

King George has kept a personal diary since his boyhood.

ABSOLUTE PARITY IN THE AIR IS AIM OF BRITAIN

London.—Previously announced plans to expand the Royal Air Force were put in the shade by the government's announcement to parliament.

The domestic air force of first-line machines will be tripled within two years, whereas the first program called for some increases over five years. The new plan doubles within two years the number of machines at home that would have been furnished at the end of five years.

First-line fighting craft at home, instead of being increased to 840 in five years, will be increased to 1,500 by March 1937. Fifteen hundred planes, absolute parity with Germany and France is the goal.

That goal the British government is determined to reach and maintain, the House of Commons and the House of Lords were told by Stanley Baldwin and Lord Londonderry, respective government spokesmen in the two houses.

The government rode roughshod over a Labor party amendment to reduce the huge air expansion expenditures by a vote of 340 to 52.

Mr. Baldwin found several points in the speech of Chancellor Adolf Hitler which he thought offered promise. In several directions Hitler had defined the German attitude. Points of his speech "deserve the closest and frankest study from all of us," he said. "We shall not fail to do our utmost to bring about in all directions all that is possible by international agreement."

Chief of Hitler's points meeting with approval of the lord president of the council, was his willingness to conclude an air convention supplementing the Locarno treaty, with the indication it could be accompanied by an agreement on limitation of planes.

Next was Hitler's indication the air pact might be found bound up with an effort to safeguard the civilian population against indiscriminate attack from the air.

Britain's defence requirements in the air had been given the most careful study, Mr. Baldwin added, and parity in the air was necessary to secure the two objects most desired by Britain—some form of collective security like Locarno, and some method of limitation. He endorsed Hitler's statement that could best be achieved starting from parity, than if different nations set arithmetical figures of their needs without relation to others.

'Plane Victims Buried

Moscow Mourns Those Who Died in Maxim Gorky Crash

Moscow.—The people of Moscow, in one of their greatest demonstrations of public grief, trudged to the new Virgin monastery and deposited the remains of the 49 victims of the Maxim Gorky disaster in crypts and graves.

The remains of Pilot Nikolai Blagin, who caused the world's worst aeroplane disaster by crashing into the Gorky while stunt flying in violation of orders, found a place of honor in burial with the others.

Although he had been held up to the public as an "air hoodlum," his ashes lay in state with the others when Joseph Stalin, dictator of Soviet Russia, stood his turn as guard of honor in the Hall of Columns of the Labor Union house.

New Aviation Record

Three Million Miles of Flying By U.S. Air Fleet

Hawaii.—Three million miles of flying over the north Pacific will have been accomplished during the six weeks of naval manoeuvres to be completed with the arrival of the United States fleet at San Diego, June 10.

Officers said this establishes a new record in aviation, with the flying under all kinds of weather and in varying conditions in the different areas of the 5,000,000 square miles between Alaska and Hawaii, and midway, and the Pacific coast.

Amendment Defeated

Ottawa.—The senate banking and commerce committee, during an amendment which would compel all persons in Canada receiving net annual incomes of \$2,000 or more to contribute 25 cents a week or \$13 a year to the Dominion unemployment insurance fund.

Ban Silver Coin Imports

Canadian Money Not Affected By U.S. Government Order

Washington.—A ban against imports of foreign silver coins was declared by the United States government in what was officially described as a "spirit of co-operation" with nations harassed by high silver prices.

Canadian money was not affected by the government's order forbidding entry into this country of foreign silver coins. The only coinage involved was that where silver content has become more valuable as bullion than in the form of currency. Peru is the largest country affected by the embargo, which also will apply to metal currencies of several other nations. A list of such countries now is being prepared.

The step was taken by Secretary Henry Morgenthau of the treasury shortly after he had disclosed new researches into money conditions abroad and stated flatly no country has made currency stabilization overtures since his guarded invitation a week ago.

The silver coin embargo on all except licensed entries was designed to aid those nations which—largely through the price-raising silver buying policy of the United States government—are confronted with the problem of preventing the melting of their coins for sale as bullion.

Bush Huskies Kill Boy

Six-Year-Old Child Attacked At The Pas

The Pas, Man.—Torn by a pack of bush-bred husky dogs on the outskirts of The Pas, six-year-old Mike Segnitovich died in hospital. The animals, owned by a local trapper, were brought in from the bush north of The Pas a short time ago. The cause of their attack is unknown.

With Joe Kryschuk, another lad of his own age, little Mike had been playing on an unused trail near his home. First intimation of the tragedy came from Mrs. Kryschuk when her son came running, shouting to her the dogs were killing Mike.

Mrs. Kryschuk found four dogs swimming over the child on the ground and, driving them off, carried him to her home nearby. The animals followed her as she carried the mangled boy along the trail. An inquest will be held.

Extending Service Term

Belgium Government Will Lengthen Time For Military Service

Brussels.—The government of Belgium will extend 18-month compulsory military service instead of the present one-year term, Albert Devese, defence minister, revealed in a speech at Mons.

Under the present system, he said, there were long periods when the army was composed chiefly of new recruits, and the country had been alarmed by Germany's restoration of conscription.

Though the defence minister referred specifically only to the machine gun forces, informal circles here interpreted his remarks to mean the cabinet would ask lengthened service for all branches of the army. He said also the government was pushing completion of border defences as rapidly as possible.

Lord Bessborough Honored

Presented With The Highest Award In Scouting

Ottawa.—In recognition of his services in his capacity of chief scout for Canada, Lord Bessborough was presented with the "Silver Wolf," highest award in scouting, it was announced. The presentation was made by Lord Robert Baden-Powell, chief scout, while on his visit here.

John A. Stiles, chief executive commissioner of the Canadian Boy Scouts Association, was similarly honored.

Playing Host To Teachers

French-Canadians To Spend Month In Toronto Learning English

Toronto.—Establishing a precedent in the educational history of Ontario and Quebec, 100 French-Canadian teachers will come here this summer to spend a month learning English. For the past nine years it has been the practice of the Ontario department of education to send Ontario teachers to Quebec city to live among French-Canadians and learn the language and this year Ontario will play host to Quebec teachers. 2100

Ramsey MacDonald May Hand Over Leadership

Reconstruction Of British Cabinet Likely To Take Place

London.—Rumors of a cabinet reconstruction to take place next month have been intensified. Speculation and gossip were keen in the lobby of the House of Commons.

Several morning newspapers asserted it was definitely decided that Prime Minister Ramsay MacDonald would hand over the leadership of the government to Stanley Baldwin, lord president of the council, in June it was believed, however, the prospect changes would not be announced before Whitehall.

When the combined king's birthday and jubilee honors list is published June 3, it is expected at least two members of the cabinet will be elevated to the peerage. They are Sir Philip Cunliffe-Lister, secretary for the colonies, and Sir John Gilmour, home secretary. Informed political quarters said this meant the reconstruction naturally would fall during the Whitman holiday, which comes June 9.

CURRENCY DUMP MEASURE TO DEAL WITH COMPLAINTS

Ottawa.—Legislation designed to adjust inequalities arising from application of the currency dump against imports from countries which have a high cost of living because of depreciated currency, such as had recently been the subject of protests from Japan, was promised by Prime Minister R. B. Bennett in the house of commons. Other measures which he said would be laid before the house shortly included seven or eight bills arising from the report of the mass buying commission, and a housing bill.

Of particular interest was Mr. Bennett's reference to the exchange measure dealing with complaints raised by Japan that the currency dump in Canada constituted a barrier to trade already much overbalanced in favor of Canada, and with similar conditions that might affect other countries.

This bill, the prime minister said, "will confer upon the government power to deal with the problem of what are called clearing house agreements and the purchase of commodities through the use of exchange arising from the sale in our markets of commodities of other countries."

Five measures dealing with the mass buying report would be placed on the order paper, Mr. Bennett said, and there would probably be two or three more dealing with the same subject. These measures have been the subject of long consideration by experts of the external affairs and justice departments and will be brought by various ministers. Their contents have been kept secret and will not be made known until the bills appear in the House of Commons. It is understood the report of the commission will be implemented to the fullest possible extent consistent with constitutional authority of the federal government.

COMPLETES LONG TASK

For thirty years Colonel Wedgwood, prominent British Parliamentarian, has been writing the History of Parliament, and has now completed the work. He worked on this colossal task for years, and only recently has had the help of a joint Parliamentary Committee. It is expected that publication costs will amount to \$75,000.

Hitler Conscription Decree

German-Canadian Club Members Will Not Respond

London, Ont.—With jeers and catcalls members of London's German-Canadian Club greeted announcement of the clause in Reichsfuehrer Hitler's conscription decree which declares that all Germans between the ages of 18 and 45, who have become foreign citizens, must return to the reich for training.

"Adolf Hitler might not recognize our Canadian citizenship," said Henry Wolfe, secretary of the club, speaking for his conferees, "but we do, Canada to us means home. We stand to lose everything if we return to Germany. We gain nothing if we go."

Elephant Kills Trainer

Veteran Circus Man Fatally Hurt When Herd Stampeded

Los Angeles.—Attacked and gored by an enraged elephant during rehearsal of an act for a motion picture, Joe Reed, veteran circus trainer, died in a hospital.

Reed was putting a herd of eight elephants and 12 tigers through the act at the Al. G. Barnes winter quarters when the elephants stampeded, and "Prince," leader of the herd, charged the trainer. He tried to climb to safety on a light pole in the centre of the lot, but the animal, breaking loose its heavy chains, gored him three times with its tusks. Attendees subdued the elephant.

International Figure

Jane Addams, Nobel Prize Winner, Dies At Chicago

Chicago.—Jane Addams, internationally known social worker and champion of world peace, died in Passavant hospital, where she had undergone a major operation.

Miss Addams, founder of the famous Chicago Social Settlement, Hull House, and a Nobel prize winner for her peace efforts, will have been 75 years old on Sept. 6.

"BIRDMAN" TO RISK DEATH AGAIN

Undimayed by the failure of his wing harness on the first attempt, William Picou, 19, above, of North Bergen, will make another try from an altitude of 10,000 feet. His first effort narrowly missed ending in tragedy when the device failed to check his fall and Picou was saved by his parachute.

Wheat Conference Opens

May Be Argentina's Last Chance To Agree To Acceptable Plan

London.—Delegates to the international wheat conference expressed the opinion Argentina may find her last opportunity in the current negotiations to enter a wheat export restriction agreement on equal terms. They warned that Canada and the United States, now that the period of relief given the glutted market by the 1934 drought has passed, will never again allow their stocks to accumulate to the extent they did in 1933.

A trade war of underselling was forecast in some quarters in the event Argentina declines to subscribe to some plan acceptable to the other conferees.

The conference will attempt to salvage whatever is possible from the wreckage of the 1933 pact, which expires August 1. United States Ambassador Robert W. Bingham will preside over the parley for which delegates from 15 countries have assembled.

For Safer X-Ray Work

Steps Being Taken To Help Correct Electrical Hazards

Ottawa.—The National Research council's associate committee on radiology has decided on steps designed to help correct electrical hazards for operators and patients existing in X-ray equipment in Canada.

In an effort to promote safer operation of X-ray equipment the committee approved publication of a brochure on the subject by B. G. Ballard, electrical engineer of the council's staff.

HITLER DECLARES GERMANY WANTS QUIET AND PEACE

Berlin.—Adolf Hitler told the former allies that Germany would abide by all but the military sections of the Versailles treaty and would limit armaments with them, even to the scrapping of submarine. In an impassioned address to the specially assembled reichstag, Hitler denounced the Versailles treaty as responsible for Europe's current armaments race.

"Germany has no intention of arming to the skies," he declared, assuring an uneasy world that he wants "quiet and peace."

Der Reichsfuehrer spoke in the Reich opera house, with 668 brown and black-shirted deputies and a group of ambassadors busily taking notes before him. His words were broadcast throughout Germany and much of Europe.

Along with this offer to halt Germany's re-armament at a level to be decided, Hitler again solemnly promised Germany would not unilaterally alter boundaries fixed by the treaty of Versailles. This was his only reference to Germany's former colonies.

The reich, he said, was ready to sign a treaty limiting the size and calibre of naval cannon and submarines. The fuhrer added that a navy 35 per cent the size of Great Britain's was all Germany would ask.

He scathingly denounced other powers for violating the peace treaty's arms limitations, thus forcing the reich to re-arm.

Hitler was thunderously cheered as he pronounced his eagerly awaited words on foreign policy.

"If Germany of to-day favors peace," he said, "it favors it neither out of weakness nor cowardice. . . . We decree every war for the subjugation of foreign powers."

"If the nations are so concerned about numerically increasing their population, they can accomplish this through an increasing readiness to bring forth offspring and, in a few years, present their nation with more children of their own people than they could foreign peoples vanquished by war."

"Nazi Germany wants peace from a primitive realization that no war would be calculated to alleviate the distress, but would tend, on the contrary, to increase it."

"Germany is immersed in the tremendous work of repairing its domestic damages. None of our projects of a factual nature will be completed before 10 or 20 years. None of our tasks of an ideal nature can find its fulfillment before 50 or even 100 years."

"What else could I desire but quiet and peace?"

RELIEF CAMP REGULATIONS ARE GIVEN IN REPORT

Ottawa.—Government policy on relief camps operated by the department of national defence gives those employed therein complete freedom of movement, according to a voluminous document tabled in the House of Commons.

The document covers all regulations issued by the department for administration of these institutions. The purpose of the camps was to provide relief for "homeless, single men," who were otherwise uncared for in other relief schemes.

Accommodation, food, clothing and medical care, and a daily allowance of 20 cents, were furnished, while the men were required to work eight hours a day, with Saturday holidays, Sundays and statutory holidays observed.

"Personnel will be free to leave the work to accept other employment offered; they may be discharged 'for cause,' and if so discharged will be subsequently ineligible for re-employment under the scheme, except when there is a reasonable probability of the men behaving properly in future," the regulations set forth.

On discharge from camp—except in a case of misconduct, the government gave free transportation to the men to the point at which they were engaged, the document said. Extension of this policy was that free transportation was also given to men who had obtained employment, the government paying their fare from the camp to the place at which they were being given a job.

"The standard of rations shall be that prescribed for the army," continues the regulation. "This is, however, the only contact point between the camps and anything relating to the army, for the next regulation sets forth:

"No military discipline or training shall be instilled; the status of the individual shall remain civilian in all respects."

Responsibility for the care of the men lay with the officer in charge of the camp. It was their object, the regulations declare, to ensure that the men's efficiency—mentally, physically, and at their trades—was so improved that when conditions permitted the men may be returned to the economic life of the country, "well able again to take up their usual work."

To assist in this, education and instructional classes were formed, while every encouragement was given for recreation and sport.

Combat Soil Drifting

Federal Government Anxious To Help Western Farmers

Ottawa.—The Dominion department of agriculture, anxious to help western farmers avoid disastrous effects of drought, announced publication of a bulletin outlining methods to control soil drifting.

Publication of the bulletin followed announcement several weeks ago that the government would institute a program of water conservation and other means to counteract conditions that produced disastrous droughts in the southern midwest area.

The bulletin deals with control of soil drifting and describes in detail precautions to be taken, such as planting cover crops and strip farming. It contains also emergency measures of control for use in areas where drifting occurs infrequently.

It says soil drifting in western Canada began almost as soon as the land was first cultivated.

Coast Relief Strikers

Would Return To Camp, But Halted By Picketers

Victoria.—Between 700 and 800 relief camp workers now in Vancouver are eager to return to the camps but they have been halted by strike picketers, British Columbia relief authorities stated.

These workers have made application to be returned to the camps, have been given routine medical examinations and are prepared to leave but cannot get past the picket posts, it was declared.

Relief statistics showed approximately 2,000 relief workers from British Columbia camps were out on strike at the end of April while 5,616 men remained in the camps. There were 7,649 men in the camps at the end of March.

Canada's Indians Advance In Education

Continued Gratifying Progress In Academic And Vocational Training

The continued growing interest of Canadian Indians in education is a matter of gratification to the Department of Indian Affairs, stated Hon. Thomas G. Murphy, Minister of the Interior and Superintendent General of Indian Affairs when interviewed recently on the progress of the Dominion's wards. Canada's treatment of her aboriginal inhabitants redounds to the credit of the administration, and the response of the Indians to the Department's efforts to advance them to a point of independence and self-support has been a major factor in the success of the work.

In nearly every year since the inauguration of day and residential schools among the Indians increases have been recorded both in the number of pupils enrolled and in the percentage of attendance. Ten years ago, in the school term of 1923-24, the total enrolment was 13,872, and the average attendance, 9,188. Last year the enrolment had risen to 17,448, a gain of 25.77 per cent, while the average attendance had advanced to 13,352, an increase of over 40 per cent.

During the fiscal year ended March 31, 1934, there were 256 day schools, 79 residential schools, and 10 combined White and Indian schools in operation, a total of 345. The residential schools are conducted by the Anglican, Roman Catholic, Presbyterian, and United Churches, and high tribute must be paid to the zeal and self-sacrifice of those engaged in the work. The Department has had the close co-operation of these religious denominations in the education of the Indians, and this well established policy has demonstrated beyond all question of doubt the effectiveness of the system.

At Lebret, in the Qu'Appelle valley, Saskatchewan, a building sufficiently large to accommodate 250 children is in course of erection to replace that destroyed by fire in November, 1932. It will be of re-erected concrete construction and will be ready for occupation about next autumn. The school will continue to be conducted by the Roman Catholic Church.

To provide increased accommodation, an addition is being made to the Residential School, near Morley, Alberta. This building is of frame construction and when the addition is completed the school will accommodate 100 pupils. This school is conducted by the United Church of Canada and is for the benefit of the children of the Story tribe.

In these schools, as in the other Indian day and residential schools, the provincial curricula is followed, with special emphasis on language, reading, domestic science, manual training, and agriculture. For the older pupils, half the day is spent in the classroom, and the remainder of the time is devoted to vocational training. There are farm lands in connection with each residential school and a member of the staff is a competent farmer. Under his guidance, the older boys carry out the farming operations and by this means they acquire a practical knowledge of farming and animal husbandry. The girls receive training in sewing, dressmaking, cooking, bread-making, and other household duties.

Every possible effort is made to impart a sound academic and industrial education and special attention is given to the health of the pupils. During the years spent in the residential schools, medical and dental treatment is provided, which with a balanced diet and supervised recreation, assists in the building up of a robust constitution.

The Federal Government of Australia has completed arrangements with the various Australian states (New South Wales, Victoria, South Australia, Western Australia, and Tasmania) for the distribution of the bounty of 8d. (six cents) per bushel granted to last season's wheat crop.

Canadian turkeys enter Great Britain free of duty. From May 2, 1935, the duty on foreign turkeys entering the British Isles has been raised to six cents per pound in place of the former duty of two cents per pound.

Telephones have just been installed on Mount Elbus, Russia's highest peak.

Trinidad will launch new public works projects to care for unemployed.

UNIQUE PICTURE OF PRINCE OF WALES ON REVIEW

This unusual view of the St. David's Day parade of Welsh Guards at Chelsea Barracks, London, was taken when the Prince of Wales, as Colonel of the Guards, took the salute. His Royal Highness can be seen at the right looking very fit after his holiday in Austria.

Climbing Plants

Judicious Use Will Add Much To The Attractiveness Of The Dwelling

There are many dwelling houses in Canada which could be made much more attractive looking by the judicious use of climbing plants. A house which lacks any pretence of beauty in architecture may have much of the stiffness taken from it by planting a vine which will break the monotony of a straight wall. Vervain, summerhoses, fences, rocks, and old stumps of trees covered with climbing plants will so change the appearance of the place that it will hardly be recognized by the person who has known it before. There are so many good, hardy, native climbers all over the Dominion that it is not necessary to go to any expense in procuring something which will produce the desired effect.

Neither is there any lack of information for those who desire it. For many years numbers of climbing plants have been tested at the Central Experimental Farm at Ottawa and at the other Dominion Experimental Farms throughout Canada, and much information has been obtained as to the relative hardiness, attractiveness, and usefulness of practically all kinds of climbing plants, with particular stress on their suitability in different districts. This information is at the service of everyone.

Climbing plants usually make rapid growth when once established. The best results, however, will be obtained by preparing the ground well beforehand. As a rule the soil about buildings is poor, and if it is the case it will well repay anyone to remove it where vines are to be planted and replace it with soil of a good loamy character, thoroughly mixing well-rotted manure with it. The choice of plants is wide and varied according to climatic conditions. There are Virginia creepers of several varieties, clematis (Western Virginia's Bower, the Virgin's Bower of Eastern Canada, Jackson, Japanese, Traveler's Joy), Peas, Honey-suckle, climbing roses, wisteria and other varieties of climbers.

Woodpecker Has A Job

People Say He Goes To Work Before Sunrise

The best minds said Adolphus, the woodpecker, would give up, but Adolphus is made of sterner stuff. So the Mervyn C. Phillips family, out on Pleasant avenue, Chicago, got no sleep again. It is Adolphus' program to arrive just before sunrise and beat a tattoo on the Phillips' copper drain pipe. On a clear morning he gets complaints from blocks around.

The big idea was to discourage Adolphus by coating the drain pipe with tar. Woodpecker experts told the Phillips that Adolphus would go away when he found the pipe sticky, and maybe wouldn't recognize it as his favorite musical instrument.

Timber For Coal Mine Props

Britain spends \$6,000,000 annually in timber for coal mine props, which means about seven-pence for every ton of coal put on the market. At present nearly all this wood is imported, but the success of afforestation schemes of recent years under which 350,000 acres have already been planted ensures that in the near future a larger proportion of this timber will be raised at home.

With curve-free tracks and advanced dispatching systems, railroad trains could speed across country at 150 to 200 miles an hour, predicts one designer. 2109

Praises Women Teachers

McGill Professor Says They Have Understanding And Sympathy

Women have made a great contribution in the field of juvenile and adult education by application of sympathy and understanding, declared Prof. John Hughes of McGill University, addressing the annual meeting of the Association of Headmistresses of Canada held in Montreal recently. Prof. Hughes made special reference to the significance of the growing movement for adult education in women's institutes. "It is no accident that this movement is built on friendship and understanding," he said, "for it is one phase of the world-wide movement towards making education a life-like process incorporating insight into human nature."

Reindeer Thrive

Increase In Herd Of 2,370 Is Reported In Wireless Message

Canada's herd of 2,370 Alaska reindeer which Andy Bahr drove across the rim of the Arctic to Kittigazuit east of the Mackenzie river, have settled down to domestic bliss in their new land.

Wireless messages from the north informed the interior department that 600 fawns already had been born and more were expected. This indicated the reindeer survived the long trek from Alaska in good condition and meant success for the department's experiment of providing a new source of food and clothing for the Eskimo.

The herd was purchased in December, 1929, and was five years on the road.

Rescue Was Impossible

Mrs. Irene Castle MacLaughlin, socially prominent and friend of dogs, looked on with a crowd of animal lovers as Frank Ballou, crack marksmen from the detective bureau, ended the suffering of a St. Bernard dog stranded on a ledge 500 feet down in a stone quarry at Chicago. Rescue of the dog was impossible.

"How interesting to meet you like this!" says the young lady to the novelist. "I've just been reading one of your novels."

"The last one?" he inquired.

"I hope so," was the fervent reply.

Phoenix, Arizona, has outlined a tall living cactus in neon lights, as an advertising sign for the town.

Good Substitute For Candle

Tasty Fish In B.C. Waters Contains Plenty Of Oil

Fish which make good candles when partly dried are found in the waters of British Columbia, according to a recent report of the Canadian Department of Fisheries. This is the oilchuck, a fish, not of great commercial importance, but a tasty fish containing great quantities of oil.

The oilchuck is usually ten inches to a foot long, and carries a long scientific name—*Thaleichthys pacificus*. It is remarkable for the great quantity of oil contained in the flesh. This oil, which at ordinary temperatures may be solid like lard, is exceptionally abundant all through the body of the fish. Instead of being strong in taste, as might be expected, it has a very delicate flavor, making the flesh of the fish so tasty. In external coloring the oilchuck is of a whitish color, the upper parts being covered with dark marks.

The oilchuck is caught from Oregon to Alaska, and while thousands of pounds of the fish are caught by commercial fisheries, many more are caught by the Indians for their own use. The Indians eat some of the fish flesh. From others they extract the oil by drying pieces of oilchuck in the sun, collecting the oil as it runs out and storing the resultant lard-like fat for future eating and cooking purposes. Still others, particularly the Indians, use the oil in the camp as workable substitutes for oil lamps or candles, and for this reason the oilchuck is popularly known as the candlefish.

Something New To Learn

Policeman Did Not Know How To

What to do when seized by an elephant? This was what a policeman in Lea Bridge, England, recently wanted to know quickly. His police college education had taught him how to handle drunks, inmates and even desperate criminals, but there was nothing in the books about clinging elephants. An amused crowd at the zoo watched the officer struggle in vain to free himself from the elephant's trunk, and it was some time before the keeper arrived and coaxed his charge away.

Son of the Sea—"Well, spose it's all right; but wot I see is—wot's the good of 'aving a ocean if ye flies over it?"—Punch.

Canada Will Benefit

Larger Output Of Silver Will Follow Price Rise

Gold was Canada's outstanding mineral last year; higher prices enabling it to make an additional contribution of some \$18,000,000 to the national wealth. But now the chief role seems likely to be taken by another metal and any clouds that may still hang over the mining industry of this Dominion are edged with a silver lining as its price moves upward towards the figure of \$1.29 per ounce officially fixed by the United States Government.

Canada, as the world's third largest producer of silver, stands to benefit materially from the rise, an Ottawa statement points out, and with a substantial increase in the annual rate of output almost certain to follow in the wake of the price rise, the earning position of Canadian producers will be enhanced by a total of from five to fifteen million dollars annually. Last year the Dominion produced 16,441,000 ounces of silver valued at \$7,803,000. On the basis of the statutory price of \$1.29 an ounce, the value would total \$21,209,000.

To the production of lead, zinc, and copper, the silver price rise is said to come as a double blessing in that it enhances the annual value of their silver output, and in addition offsets to a marked extent the prevailing low prices of lead, zinc, and copper. The gold mines of the country will also share the benefits as, without exception, they are to a greater or less extent producers of silver, likewise—Quebec Chronicle-Telegraph.

The Accident-Free Driver

Is One Who Considers Safety Of Himself And Others

Charles Whalen, an Owen Sound bus driver, has driven motor vehicles 800,000 miles in eighteen years without an accident. On this record General Motors bases the first of a series of advertisements directed at the encouragement of safer driving and the prevention of accidents.

As the advertisement suggests, the builders of motor cars can do much to save accidents, but not everything. They can, and do, follow sound lines in engineering and use safe materials. Tires and brakes have been enormously improved in recent years. But the manufacturer cannot guarantee a clear road, cannot put driving sense in the individual behind the wheel.

The motorist who comes down to the factor of personal responsibility. When a motorist is able to say—and many are—that he has driven for years without any mishap it is not that the gods are especially kind to him. The accident-free driver is a sensible driver who understands and accepts his responsibilities. He is concerned less with his rights than with his safety, and the safety of others.—Ottawa Journal.

A Sporting Offer

Maoris Willing To Play War With British Soldiers

Sir Alfred Pickford, deputy chief of England's Boy Scouts, tells this one.

"During the war with the Maoris, Australian aborigines, the Maori chief who understood and accepted his responsibilities. He is concerned less with his rights than with his safety, and the safety of others.—Ottawa Journal.

"The Maoris willingly offered to supply the British with more ammunition, so that they could fight on level terms."

Express Loyalty To King

Message Of Congratulation Sent From Indian Tribe In Ontario

Giving fervent expression of their loyalty, the Six Nations Indian Council has forwarded a resolution of congratulation to Their Majesties, King George and Queen Mary, on the attainment of the silver anniversary of their accession to the throne. "We beg to confirm the continuance of our loyalty to your majesties and to the flag which our warriors have demonstrated in many wars fought side by side with Imperial troops since British and Indians first clasped the hand of friendship," said the resolution.

The total number of pedigree certificates registered by the Canadian National Livestock Records, approved by the Dominion Minister of Agriculture, during the month of April, 1935, included 277 horses, 3,002 cattle, 449 sheep, 306 swine, 760 fowls, 581 dogs, 51 poultry, and one Saanen goat.

The Princes Of India

London Business Houses Glad They Came To Jubilee

Scotland Yard was given a tough assignment to guard the jewels of the Indian princes who voluntarily went to London for the King's silver jubilee. More than 100 princes and court notables attended, and it is estimated their combined jewels are worth around \$225,000,000.

These princes always travel with their jewels and retainers, in some cases hundreds of people accompanying them. For weeks before the jubilee the accommodation of liners was booked up. Some of the princes almost needed all the saloon accommodation to themselves, just as they require whole floors in the best London hotels. Their decision to attend the jubilee means an enormous expenditure which is a godsend to London business.

The Maharajah of Patiala, who visits London frequently, had 300 pieces of baggage. When out for an evening he wears among other jewels a \$500,000 rope of pearls. The Maharane of Kashmir wears a dress of spun gold embroidered with precious stones. The Crown Princess of Hyderabad, daughter-in-law of the Nizam of Hyderabad, believed to be the richest man in the world, wears the jewels of "Abdul the Damned" which the Nizam gave her for a wedding gift, jewels the value of which are beyond commercial computation. There are Indian princes who have whole rooms full of gold and jewels. There is more jewelry among the princes of India than in all the jewelry stores of the world.

The Maharajah of Bikaner brought his own cooks with him, and all his livestock, which does not include beef, for the cow is sacred. The Savoy Hotel knows how to cater for the Maharajah, and sets special rooms aside for the fowls and pigeons he brings over. Each of these birds has to be blessed and cooked according to ancient ceremonies. The princes entertain English guests lavishly, but they never eat with them. A Christian must never see them eat.

There is no other country in the world where there are such contrasts between enormous wealth and abject poverty. If the natives of India were as the people of other lands these conditions would result in Communism. But the natives do not resent it at all. They believe in reincarnation and endure their lot in the hope that in their next incarnation they may be what the princes are to-day.—St. Thomas Times-Journal.

Reforestation Plan

Proposed Scheme Plant Trees In Saskatchewan Province At Once

A Dominion reforestation scheme for drought areas of Saskatchewan, involving more than \$2,000,000 at its outset, is advocated by Senator A. Marcotte, veteran Ponsie legislator. The plan will take material form in the shape of a resolution to be presented to the senate either during the coming session or the one following.

It would, Senator Marcotte emphasized, be entirely financed and carried out by the Dominion government. Reclamation might be utilized but not, he explained, at relief wages. The scheme would be extended over a period of eight to ten years and would result in heavily forested lands in southern Saskatchewan where arid farmers were hitherto found.

"Of course that would mean reclaiming thousands and thousands of acres of farm lands," he said.

Ask For Plebiscite

Protests Against Beer Licenses Received From Many Points In Saskatchewan

Protests against beer licenses and petitions for plebiscites have been received from one city and 27 other communities in Saskatchewan. They are:

City of Swift Current; towns of Bredenbury, Cabri, Carlyle, Cardruff, Eaton, Grenfell, Langdon, Lumsden, Milestone, Vanda, Govan and Wadena; villages of Big River, Birch Hills, Borden, Carleton Place, Eyebrow, Estelon, Filmore, Galsworthy, Glen Ewen, Imperial, Kinsale, Lake Lenore, Neville, Pelly, St. Brulex, and hamlet of Niteburg. Machinery for the plebiscite will be set in motion for voting as soon as possible.

"I want a good cure for rheumatism. A good one."

"I can recommend this. Mr. X took it for over twenty years."

Sometimes a good scarce is worth more to a man than good advice.

Mr. and Mrs. Everett Bills, Jim Cumming, Constable Cameron and Frank Collicutt attended the closing day of the races at Calgary on Wednesday. Taxaudrius an outsider won the derby.

Review of Board of Trade

(Continued from Last Week)

Then again the Superintendent of the C. P. R. was written to in connection with the road leading from the Main St. across the railway track to the elevators; also the placing of cinders in the low places south of the station, the C. P. R. officials co-operated with the Board of Trade and carried out these improvements. When the new station was built a delegation of the Board interviewed the C. P. R. officials in connection with having a platform built on the west side of the freight shed, as this was overlooked in the contract at the time and this addition has proved of great benefit to the shippers of cream, and also for those who have the loading of other freight shipped through the C. P. R. Again the Board were the means of having a good approach to and from the station.

The interests of heavy traffic going to the grain elevators, oil tanks, and stock yards have been taken care of by the Board, and only last year the road leading to the above places was graded and three carloads of material shipped in early last fall for maintenance work. Again the attention of the C. P. R. was brought to the dangerous approach to the railway crossing north of the station and the approaches on either side as well as the crossing itself were filled and widened.

Early in the spring of last year a Short Course School was held in the U.F.A. Hall on the feeding and raising of broom type hogs, and by officials from the Agricultural Department of the University of Alberta. This proved a great success. Late in the summer the Board sponsored an Agricultural Day and Mr. F. Metherall kindly permitted this to be held at his farm this again was given by the officials from the Agricultural Dept. at Edmonton. The Field Day included the judging and demonstration of livestock, and in the evening a banquet was given in honor of the event with Dean Howes the speaker of the occasion.

The School Fair which is now in its fifth year and well established, was sponsored by the Board the first two years and it is owing to this start that the School Fair is such a success at the present time. Our annual good will motor tour is made every summer in which many take part, and which also gives much publicity to the district.

Now we come to the entertainment side. Many well attended banquets have been held during the past five years and many public speakers of note have visited Crossfield within that time to speak at these banquets.

It makes one wonder at times whether a community of the size of the Crossfield district is not being over done with social organizations, or else the citizens lose enthusiasm after a certain length of time for any one thing and wish for something else, because the last few get together meetings held by the Board were not supported as they should have been.

The Board has always received a strong membership and there has never been less than 130 members each succeeding year, furthermore the Board has been most fortunate in the choosing of its President's and this year Mr. Frank Collicutt was re-elected President for a second term.

Last but not least, we come to that spirit of friendship which now exists throughout the Crossfield district, let us hope this spirit will be with us for many years to come, but which can only be maintained by the constant co-operation of all the citizens in the community.

Today's Oddest News

He Thinks Social Credit Do Better

A farmer who has been glad of the protection of the Debt Adjustment Board for nearly three years was heard last week complaining that the Debt Adjustment Board had not reduced his debt on a farm he had bought. He wanted a reduction of debt and a reduction of interest. This in spite of the fact that the man he owed was another farmer and a doubt depending on these payments.

The next moment he told of applying to the Farm Loan Board for a loan to buy another farm and was refused. He said, "What good is the Farm Loan Board if they won't loan us some money?" He is voting "Social Credit."

Get This
No one can get something for nothing without some one else taking nothing for something.

Social Credit.

Dear Editor.

Since writing you last time I understand you have been a little under the weather, but I hope you are entirely recovered by this time. I just want to say that I am still in favor of "Real Social Credit" and I am sending you the good news that in this entire district in the last two weeks people are turning away from the Aberhart Taxation Scheme.

Here are the reasons:
No. 1. Fourteen months ago Aberhart was advocating that the basic dividend would come out of excess incomes, the mines and the produce would turn in the whole and would not be reimbursed until the adjustment was made for the non-working and non-producing classes.

No. 2. Three months ago, Aberhart was advocating that there would be an unearned increment charged into the retail price of goods to be paid by the consumer to rebate the State Credit House for the basic dividend issued.

No. 3. Today Aberhart is advocating that the basic dividend will come out of the price spreads of which we have no control of the articles manufactured and produced outside of this Province, the British North America Act distinctly states we can only control the prices of what is produced and consumed in Alberta.

No. 4. The continuous shifting of ground by Mr. Aberhart, one day it is one thing, one day it is another thing, has caused people to lose faith in what he is advocating and also himself. The cocksure attitude of Mr. Aberhart has lost its effect and his latest yarn that the basic dividend will come out of a fountain pen has failed to hold the intelligent imagination of the better element of the people of this Province, and his offer of \$25.00 per month, not costing anyone a cent—coming out of the end of a fountain pen. When examined, if this is free why not make \$100.00 per month, why stop at \$25.00? Let Mr. Aberhart and his supporters back their theory with facts and figures, if what he advocated fourteen months ago was a No. 1, why change it to what he advocated three months ago, and if that was concrete, why change it to the end of a fountain pen? The only reason possible is that Mr. Aberhart is making a supreme bid for political power at any cost.

Hoping if you are still ill that the end of your fountain pen will carry all costs necessary, I am,

Yours truly,
P. H. SWANSON.

ALONG BROADWAY—Milt McCool cashing in on the send-a-dime chain letter craze.....Doug Hall, John Chalmers, Ben McLeod rolled into town from the Russian wedding the other morning and they were trying to sing the Volga Boatman. Fred Stevens playing newboy while his grandson Jimmie was playing ball in the Midget League.....One of our soldier boys going down the main drag with a waist held on by his turtle dove.....Tom Tredaway explaining the highlights of the soccer game.....Jim Cumming received some nice cakes, etc. from an unknown cook.....Archie McFadyen won a two to one bet on Rossford that well known local plunger R. B. McIntyre.....Tom Fitzgerald is still taking Mus-kee-Kee and he is getting better looking day by day.....Culver Calhoun is tearing down a large grain separator that Ed Meyers used for many years—Cal will soon have the shop of a million parts.....The Wednesday half-holiday it supposed to commence next Wed.

Perplexed
R. R. 1, Crossfield
The Editor, Crossfield Chronicle
Sir:

Your correspondent of last week seemed very anxious to tell us something, and I am just as anxious to know, just what is this "Retail Dollar" he mentions? also what is "Real Social Credit" as per his letter.

Perplexed.

"TOO MUCH WEALTH IN THE HANDS OF A FEW PEOPLE"

In the countryside, in streets of villages, towns, cities; in homes, in market places, from pulpits and public platforms; from men in many walks of life you hear the same pronouncement—"Too much wealth in the hands of too few people."

Who can rectify such an unsatisfactory state of affairs? In the grain business the grain growers have the remedy in their co-operative marketing organization. All they need to do is to give their patronage.

Co-operative organization is the most effective means of preventing accumulation of great fortunes in the hands of a few people.

Co-operation never makes millionaires.
Patronize.
